NARRATIVE

This survey was performed at the request of Mr. Kim Harding to locate the lines of Lots 7 and 8 of Section 22. These lots were formed by the meanders of the Duchesne River at the time of the General Land Office survey in 1882. This section was surveyed using the "3-mile" method to locate the position of the interior quarter-quarter corners (sixteenth corners). The corners to the aliquot parts of this section that were found or set by this survey are as shown. The position of the Duchesne River was determined by overlaying the scaled drawing of the 1882 survey over the drawing of the section as determined by the found and reestablished corners of this survey. The lot lines of the 1882 survey were the banks of the river at that time. The old river channel between these banks has since been abandoned by the course of the river and no longer exists in the 1882 position. Therefore, the riparian rights of the lots on each side of the old river would extend to the old centerline of the abandoned channel. The location of this centerline was then determined and monumented on the ground as shown.

SURVEYOR'S CERTIFICATE

This is to certify that I have surveyed the parcels of land shown on this plot, and that the monuments indicated were found or set during said survey, and that this plot accurately represents said survey to the best of my knowledge.
